Zinoviev, V., 207, 391

Title Index to Volume 21

A Comparison of Etchants for Quantitative Metallography of Bainite and Martensite Structures in Fe-C-Mo Alloys, 91

The Compound Formation of Mechanism of Butterfly Martensite, 1

A Computer Program for Plotting Stereographic Projections, 33

Discontinuous Precipitation and Coarsening of Lamellar Cellular Precipitate in Fe-Zn Alloys, 11

Effect of Electropolishing Variables on the Current Density–Voltage Relationship, 365

Effects of Thermal Aging on 12Cr-1Mo Steel, 347

Electron Microscopy Studies of the Martensitic Transformation in an Aged Ti-5lat% Shape Memory Alloy, 275

Electron Microscopy Studies of the "Premartensitic" Transformations in an Aged Ti-5lat%Ni Shape Memory Alloy, 255

A Fractal Dimension Method for Characterizing WNiFe Presintered Materials, 377

High Resolution Autoradiography for Revealing Sulphur Segregation at Austenite Grain Boundaries, 317

Improved Metallographic Preparation of In-657 Alloy by High Temperature Oxidization, 217

Influence of Magnification on Feature-Specific Image Analysis Measurements, 327

Maraging Behavior of an Fe-19.5Ni-5Mn Alloy II: Evolution of Reverse-Transformed Austenite During Overaging, 425

Maraging Behavior in an Fe-19.5Ni-5Mn Alloy I: Precipitation Characteristics, 399

Metallography of a Melt-Quenched Aluminum-Cobalt Alloy, 179

Metallography of Copper-Tin Alloys, 137

Methods for Determining Particle Distribution Parameters from Extraction Replica Data, 473

Microstructural Development in a Duplex $FeAl_{10}Mn_{29}C_{0.4}$ Alloy, 199

Microstructure and Deformation Resistance of Quirnary Pb-(Al, Mg, Sn, Li) Alloys, 165

The Microstructure of Extruded Ingots of Ni_3Al Containing Boron, 391

Microstructure of Ni_3Al Ingots Containing Boron, 207

A Modified Cold Mounting Technique, 103

Novel Method for Studying the Complex Microstructure of a $Sm(Co/Fe/Cu/Zr)_7$ Permanent Magnet Alloy, 125

On the Microstructure of Rapidly Quenched Co-10 wt.% TaC, 41

Plastic Deformation Around Fatigue Cracks, 77

A Quantitative Microstructural Study of Intergranular Liquation and its Relationship to Hot Cracking, 453

Simple On-Line Method for Finding Low-Index Zone Axes in TEM, 227

Simple Technique for Revealing Prior Austenite Grain Boundaries in CrMoV Turbine Rotor Steels, 233

Stereological Analysis of Creep Cavities on Polished Sections, 55

Stereology of Plane Convex Loops Distributed in the Three-Dimensional Microstructure, 241

A TEM Study of Precipitates in an Al-Mn-Si Alloy, 293

Toughness and Fractography of Austenitic Type 304 Stainless Steel with Sensitization Treatments at 973 K, 151
